

PRODUCT SPECIFICATION REPORT

Battery Coat™, a heavy-duty battery terminal protector and sealer, is a blend of organic resin polymers dissolved in fast-evaporating solvents.

BATTERY COAT™

PROD.#0108

Battery Terminal Protector and Sealer

FEATURES/BENEFITS:

Increases Battery Life	Prolongs battery terminal and cable life by sealing out acid fumes, moisture, dirt, grease, and oil.
Forms a Tough, Durable Coating	Protects against corrosion.
Fast Drying	Evaporates quickly, leaving a protective coating behind.
Long Lasting	Remains flexible at low temperatures. Will not crack, chip, or peel.
Tinted Red	Helps to identify coverage.
Easy to Use and Economical	Packaged in a handy aerosol. Saves time and labor.

APPLICATIONS:

Use on any battery-operated and/or powered equipment, including automobiles, boats, motorcycles, tractors, road grading equipment, bulldozers, fork lifts, and golf carts. Particularly useful in the industries of: Automotive Repair Shops, Marine Products Manufacturing, Industrial Machinery Manufacturers, and Motor Vehicle Body Manufacturers

COMPANION PRODUCTS:
