PRODUCT SPECIFICATION REPORT

ZEPRIDE E™

A Fast Acting, General Purpose Cleaner and Degreaser

DESCRIPTION

Zepride E is a premium grade, fast acting, multi-purpose liquid cleaner and degreaser.

FEATURES

- Powerful
- Non-corrosive
- Controlled foam
- Non-flammable
- Acceptable in food processing facilities

BENEFITS

- Formulated for efficient removal of toughest soils.
- No caustics, acids or abrasives to harm painted surfaces, metals and other inanimate surfaces when label directions are followed.
- Rinses quickly and completely from cleaned surfaces.
- Will not ignite or support combustion
- Acceptable as a floor and wall cleaner in all departments and as a degreaser in non-processing areas.

APPLICATIONS

A versatile product for cleaning auto engines and chassis; cleaning vinyl and plastic upholstery; painted and unpainted machinery and equipment; painted woodwork; whitewall tires; cleaning and stripping of composition floor, including terrazzo, ceramic tile and concrete.

ZEPRIDE E™

A Fast Acting, General Purpose Cleaner and Degreaser

ACCEPTABLE FOR USE IN FEDERALLY INSPECTED MEAT AND POULTRY PLANTS.
Non-flammable; has no flash point.

DIRECTIONS:

NOTE: High concentrations of ZEPRIDE-E can attack painted surfaces and polished aluminum. Test an inconspicuous area before use, or use very dilute solution. ALWAYS RINSE AFTER USE.

For Degreasing Automobile Engines, Chassis, Etc.: Dilute 1 part product with 3 to 5 parts hot water. For very greasy surfaces, allow to soak 15 to 20 minutes before rinsing with a strong stream of water.

For Use in a Steam Cleaning Machine: Dilute 1 part product with 10 to 30 parts water, depending on degree of soil.

For Cleaning Painted and Unpainted Machinery and Equipment: Such as tool and die stamping machinery, newspaper presses, linotype machines, bottling equipment, textile machinery, and the like; Dilute 1 part ZEPRIDE-E with 2 to 5 parts water depending upon the degree of soil. Apply by spraying, wiping, or brushing. (Dilution with hot water will increase cleaning power of ZEPRIDE-E.) Allow solution to soak on machinery for two or three minutes and then wipe dry with clean cloth or rinse with water.

Preparation of Metal Prior to Painting: Cleaning as directed above results in a surface that is in excellent condition for priming or painting.

Plastic and Vinyl Upholstery: Dilute 1 part product with 3 to 10 parts water. Wipe or spray on surface to be cleaned, allow to remain a few seconds, then wipe off with a clean, damp cloth.

Painted Woodwork: Dilute 1 part product with 10 to 30 parts water. Apply solution with cloth or as a spray. Allow to remain a few seconds, then wipe off with clean, damp cloth or sponge.

Whitewall Tires: Dilute 1 part product with 2 to 5 parts water, depending on degree of soil. Spray solution on tires and allow to remain on surface approximately one minute. Rinse with strong stream of water. Stubborn spots may need brushing.

FLOORS: Composition - Cleaning: Dilute 1 part product with 20 to 30 parts water and scrub floor in usual manner. Rinse floor thoroughly.

FLOORS: Composition - Stripping: Dilute 1 part product with 5 parts hot water and apply to floor. Allow solution to remain on surface approximately five minutes, then scrub with floor machine. DO NOT permit stripper solution to dry before rinsing. Rinse with warm water.

CAUTION: DO NOT apply ZEPRIDE-E undiluted to composition floors.

FLOORS: Terrazzo and Ceramic Tiles - Cleaning: Dilute 1 part product with 10 to 40 parts hot water. Scrub floor in usual manner and rinse.

FLOORS: Concrete - Cleaning: Dilute 1 part product with 5 to 20 parts water, depending upon soil. Scrub thoroughly and rinse.

For Automatic Scrubbing Machines: Use three ounces of product per gallon of water for general cleaning. For heavy-duty cleaning, degreasing of concrete, and wax stripping, use six ounces of product per gallon of water.

BIODEGRADABLE: All detergents used in the manufacture of this product are biodegradable.

NOTE: For incidental use to deal with limited special applications such as hard-to-remove soils or stains, this product may be used at a greater concentration than stated above or as a concentrate.

contact. Inhalation of spray mists or vapors may cause respiratory tract irritation. Overexposure by inhalation or absorption can produce central nervous system depression resulting in headache, nausea, and/or dizziness. DO NOT breathe vapors or spray mist. DO NOT swallow this product. Repeated exposure can have cumulative effects. Chronic overexposure may cause liver, kidney or red blood cell damage. Exposure may aggravate existing skin or respiratory disorders. Further information on the effects of overexposure is included on the Material Safety Data Sheet, which is available upon request. Zep advocates limiting exposure to all chemical products. Wear splash-proof safety goggles during product use and whenever eye contact is possible. Wear natural rubber, nitrile, neoprene, or other resistant gloves. Use product in well-ventilated areas only; open windows/doors and use exhaust fans in enclosed areas. Remove contaminated clothing promptly and DO NOT rewear until thoroughly cleaned. After handling, wash hands thoroughly with soap and water.

FIRST AID:
EYES: Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately.

SKIN: Immediately flush affected skin with plenty of water for at least 15 minutes. Get medical attention if irritation persists.

INHALATION: If symptoms occur, move exposed person to fresh air. If symptoms persist, get medical attention immediately.

INGESTION: If product is swallowed, DO NOT induce vomiting. If vomiting occurs, keep head below hips to prevent aspiration (breathing) of liquid into the lungs. Get emergency medical attention immediately.

DISPOSAL AND/OR SPILL INFORMATION: As with all cleaning and maintenance procedures, run-off from the cleaning or maintenance process should be diverted to a collection vessel, or where permitted, to a sanitary sewer (consult local and state regulations) and not allowed to soak into the ground or to enter a storm sewer. If this product is spilled or contaminated and cannot be used, creating the need for disposal, absorb product on an inert absorbent material, such as Zep-O-Zorb or Zep Super Sorbent, and deposit in a sealable container. Rinse area well with water.

STORAGE: Store tightly-closed container in dry area at temperatures between 40° and 120°F. DO NOT store at temperatures below 32°F. Keep this product away from food and food products.
