

# PRODUCT SPECIFICATIONS REPORT

Vehicle Maintenance kit that improves the smell and performance of vehicle A/C systems. Kit includes: Foaming Evaporator Core Cleaner, A/C Intake Refresher and application hose.

## A/C REFRESHER KIT

Vehicle Maintenance Product

PROD. #568000008

### FEATURES BENEFITS

- Cleans and freshens the air ducts and eliminates odors permeating in the ducts.
- Heavy duty foam removes dirt and other residue from the evaporator core.

### DIRECTIONS

#### Step 1 – Foaming Evaporator Core Cleaner

Locate the evaporator drain tube and place a drain pan directly underneath. Insert the wedge of the applicator into the drain tube. Depress the valve slowly and dispense half of the contents of the can, shaking the can periodically. Remove the wedge and allow the liquid to drain completely. Reinsert the wedge and dispense the remainder of the can. When the can is empty, allow the contents to drain completely.

#### Step 2 – A/C Intake Refresher

Locate the Fresh Air Intake – it’s a grated opening under the passenger side windshield. This is where you will apply the Intake Refresher. Before performing the service, remove the cabin air filter if there is one. Start the engine and turn the A/C control to fresh air and turn the blower control to the high position. Now select body mode from the climate control selection. Spray product into the Fresh Air Intake for 45 seconds. Switch the climate control setting to the floor vent mode and continue spraying for another 45 seconds. Finally, select defrost mode and spray the remaining contents of the can into the fresh air intake. Continue running the blower for 5 minutes with the windows down. Perform a final hood check to make sure everything is connected properly. Perform a final test drive with the A/C on and the windows down.

### SPECIFICATIONS

#### Foaming Evaporator Core Cleaner

Physical Form	Aerosol
Color	Colorless
Odor	Alcohol-like, ammoniacal
Flammability	Low Flammable
pH	12.5
Shelf Life	1 Year minimum
D.O.T. Shipping Label	Not Regulated

#### A/C Intake Refresher

Physical Form	Aerosol
Color	Colorless
Odor	Characteristic
Flammability	Low Flammable
Shelf Life	1 Year minimum
D.O.T. Shipping Label	Not Regulated

### PACKAGING

Foaming Evaporator Core Cleaner: 18 oz. weight  
 A/C Intake Refresher : 4 oz. weight
