

# PRODUCT SPECIFICATION REPORT

Drain Cutter Ring is an effective product for drain maintenance in all food preparation and processing facilities. It helps to keep drains free-flowing and odor-free.

## DRAIN CUTTER

PROD.#M930

Quat-Based Drain Ring Treatment

### FEATURES/BENEFITS

Quat-Based	Drain Cutter is impregnated with quaternary ammonium chlorides to maintain drains and eliminate sources of odor.
Easy-to-Use	Simply form the ring into a circle and place in the drain.
Long Lasting	Typically, Drain Cutter should be replaced monthly, varying slightly based on water flow. Throw away the old blue knit cover when replacing with a new ring.
USDA Applicable	Acceptable for use in drains in food processing facilities.

### APPLICATIONS

This product is designed for use in drains of all types, including those with flowing water. Great for use in: bakeries, wineries, breweries, dairies, seafood processing plants, red meat processing, canneries, poultry plants, and egg processing facilities.
